Blue Steel: Copilot says "That video is actually a public service announcement created entirely with AI, specifically using Google Veo 3. It's designed to look real—but it's completely synthetic. The creators made it to raise awareness about how convincing AI-generated videos can be, especially when used in scams like deepfake donation requests or voice-cloned messages.

 So yes, it's fake—but intentionally so, to show how easy it is to be fooled."

Carl Ott: Thanks Ed for the link- We described that Amazon offers free tours of their warehouses. Carl did such a tour in Grapevine TX last week. Was time well spent. Most present on RBNV expressed an interest - > hence DPG should try to plan an outing / probably a month or two in advance to get sufficient tickets
