

DPRG RBNV Chat Record – September 13, 2022

Doug P.

7:43 PM

Ray showed experiments with a 630nm filter added to a 12mm lens holder for OpenMV.

Doug P.

8:00 PM

Doug talked about his experiments with a color sensor (AS7262 – Adafruit) based on Ray's work presented last week.

8:14 PM

John Gauthier showed his progress on his 2nd moving eyes project.

Doug P.

8:18 PM

John Gauthier showed his Rpi hack to allow headless shutdown and turn on/off an app with the push of buttons. It also has LEDs to show status.
